

At Behavioral Health Group,
our purpose is *renewal*

As the largest Joint Commission-accredited outpatient treatment network in the U.S., our personalized approach to opioid treatment, and recovery **restores** lives, **strengthens** families, and **rejuvenates** communities.

What we do

We are committed to delivering personalized opioid treatment and recovery by leveraging the full spectrum of evidence-based opioid recovery care, tailored to the unique needs of each patient.

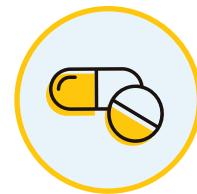

BHG data shows that **patient risk factors are reduced by 40%** and **use scores are reduced by 53%** after 3 months of treatment. Risk factors and **protective factors improve for up to 5 years** following the start of treatment.

How we do it

Whole-patient approach

BHG integrates a full spectrum of outcomes-based medicine and wraparound services to address all factors affecting recovery - meeting patients exactly where they are in their recovery journey.

This includes these and other services:

Medication Assisted Treatment (MAT)

Assessments and lab management

Cognitive Behavioral Therapy (CBT)

Individual and group counseling

Case management

Medication Assisted Treatment (MAT)

BHG is one of the only 4%* of providers nationwide to offer all three FDA-approved Opioid Use Disorder medications (methadone, buprenorphine, and naltrexone), case management, and addiction counseling services, including intensive outpatient programs (IOP).

*Pew Charitable Trust

Research shows that MAT provides patients:

reduction in opioid use

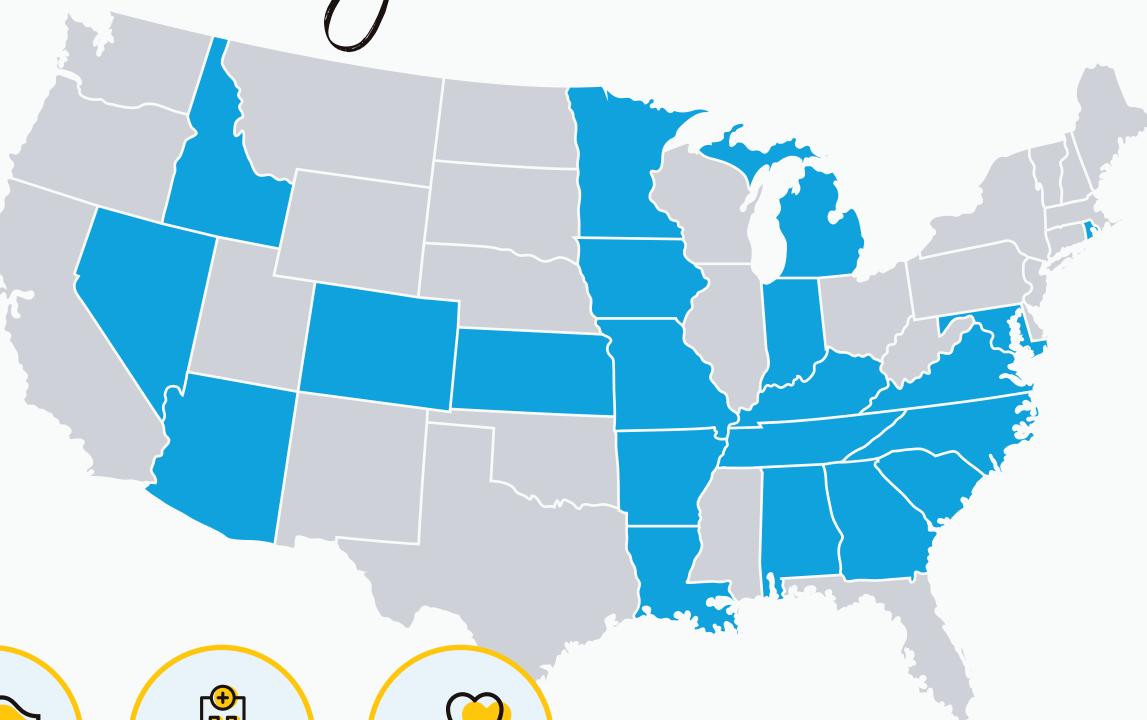

reduction in overdose death

more likely to achieve long-term recovery
